GOWTHAM A P

FRONT END AND AI DEVELOPER

gowthamap4@gmail.com | +91 8428974940 | Mecheri, Salem

Profile Summary

I am a motivated undergraduate student with basic knowledge of computer science concepts such as programming, operating systems, and computer networks. I have gained practical experience through academic projects and lab work. I am a quick learner, hardworking, and willing to learn new technologies. I work well both independently and in a team and am looking for an internship where I can gain real-world experience and improve my technical skills while contributing to the organization.

- Problem Solving

Education

S R V Matric Higher Secondary School, Pottaneri   *2022 – 2023*
   HSLC - 78%

K.S. Rangasamy College of Technology, Tiruchengode   *2023 – 2027*
   B.Tech Artificial Intelligence and Data Science
      CGPA - 7.9

Projects

Intelligent Chatbot & System Automation

- Developed an AI-powered personal assistant that interacts with users through natural conversational chat.
- Implemented voice and text command processing to understand user intents accurately.
- Enabled system-level automation to open applications and perform basic desktop tasks.
- Integrated NLP techniques to provide relevant, context-aware responses.
- Designed the assistant to improve user productivity by automating repetitive actions.

Expense Tracker Web Application

- Developed a web app to track daily income and expenses.
- Implemented category-based expense management and summaries.
- Designed intuitive UI for easy financial tracking.
- Stored user data securely with authentication support.
- Generated monthly expense reports for better budgeting.
